Universität St. Gallen

Conference «Water and Light»

The Centro Latinoamericano-Suizo (CLS-HSG) is proud to invite you to the first Colombian-Swiss Conference on «Water and Light: Managing Strategies to Scale Up Sustainable and Environmental Projects in Colombia»

University of St. Gallen, September 3-4, 2012.

With the support of the Swiss State Secretariat for Education and Research, our conference will bring together scholars, researchers, and entrepreneurs from Colombia and Switzerland. They will explore new ways of taking sustainable social and environmental projects to the next level, so that these can leave their niche and tap into mass markets. What impact does a project like «Un Litro De Luz/A Liter of Light» have on communities, culture, the environment and the economy? What new technologies will change the supply of drinkable water? These and other questions will be at the core of our conference.

University of St. Gallen, Auditorium 09-011 (Library building)

Monday, September 3, 2012, 10:00 – 19:00

Tuesday, September 4, 2012, 9:00 – 18:00

The Conference is free and open to the public.

Please register by e-mail and indicate on what days you would like to join the conference:
